

## tomorrowmensch Capital

### Our Investment Thesis

tomorrowmensch Capital exists to invest in the future of human intelligence, vitality, and civilization — where philosophy meets deep technology and capital becomes a catalyst, not a constraint. We invest where technology reshapes what it means to be human — and where thoughtful capital can accelerate that responsibility.

### What We Invest In

We invest in **deep-tech and science-driven ventures** operating at the intersection of:

- **LIFE** — biology, health, longevity, regeneration
- **INTELLIGENCE** — AI, neurotechnology, human-machine interfaces
- **INFRASTRUCTURE** — quantum, data, materials, computation
- **ENERGY** — abundance, decentralization, intelligent systems

We focus on companies where:

- Breakthrough science meets real-world application
- Defensibility comes from knowledge, IP, data, or systems — not speed alone
- The ambition is global from day one

### Stage & Structure

- **Stage:** Seed to Series B (incl. selective secondaries)
- **Geography:** Europe-first, globally relevant
- **Instruments:**
  - Direct equity
  - Secondary positions
  - SPVs and co-investments alongside aligned partners

We prefer flexible, operator-led structures over rigid fund mechanics.

tomorrowmensch Capital is not a traditional 10-year VC fund. It is an adaptive capital platform designed for cyclic innovation.

## How We Create Value

Capital alone does not build category-defining companies. tomorrowmensch brings three integrated value layers:

### 1. Capital with Conviction

We invest with clarity — aligned with the realities of deep-tech timelines.

### 2. Narrative & Visibility

Through tomorrowmensch Media and Circle, we help founders:

- Articulate complex ideas clearly
- Build trust with investors, partners, and society
- Shape category narratives before markets fully exist

### 3. Strategic Acceleration

Where relevant, portfolio companies may access:

- Strategic positioning & long-term roadmap thinking
- Investor readiness and capital formation support
- Access to a trusted network of founders, scientists, and capital partners

*We are selective, hands-on by choice, and aligned by design.*

## What We Expect from Founders

We partner with founders who:

- Build from first principles, not trends
- Take responsibility for the societal impact of their technology
- Are open to long-term thinking — intellectually and ethically
- Value clarity over hype, progress over performance theater

We do not seek perfection. We seek *intellectual honesty, ambition, and courage.*

## What Investors Can Expect

tomorrowmensch Capital offers investors:

- Curated access to high-conviction deep-tech opportunities
- Alignment through transparent structures and co-investment logic
- A philosophy-driven approach without sacrificing financial discipline
